

INDUSTRIOS
SOFTWARE, INC.

"All ERP systems' shipping functions should work as well as the INDUSTRIOS Shipment Workbench."

Cary Glover, Controller,
Universal Motion Components

IndustriOS Distribution Suite

A fully featured distribution suite designed for operations that pave a path to increased profitability

The INDUSTRIOS Distribution Suite functionality goes beyond the basics of distribution requirements that include purchase planning, shipment planning, physical count, multi-bin inventory, shipping integration and robust analysis tools.

INDUSTRIOS strengthens its offering with features such as handling of consignment inventory, blanket orders with releases, full end-to-end landed costing, sales order kitting with analysis tools, external shipment interface for carrier management, and more.

This makes the INDUSTRIOS Distribution Suite a fully featured set of tools to help companies minimize investment in inventory, improve on-time deliveries, manage vendors and third parties, accurately cost transactions, and streamline internal processes, all contributing to paving a path to your increased profitability.
