

Measure what you want to manage, and publish it in real time, to foster a culture of employee engagement and accountability. INDUSTRIOS ERP with PlantGauge™ helps get all your people working towards common company objectives.

IndustriOS PlantGauge Manufacturing Intelligence Dashboard

The primary goal of **Manufacturing Intelligence** is to turn large amounts of manufacturing data into real knowledge to **drive business results**. INDUSTRIOS ERP Manufacturing Suite captures your operations data in real time.

Complemented by PlantGauge Manufacturing Intelligence Dashboard, your data can be analyzed, presented and/or even published to direct staff focus on your plant objectives.

Out of the box, the PlantGauge Manufacturing Intelligence Dashboard offers standard views into your operations in the following areas:

1 Sales and Shipping:

Publish your sales data to draw attention to performance on KPIs such as late shipments this week, new orders, and unshipped late orders.

2 Human Resources:

Highlight Late Clock-Ins, Early Clock-Outs, or number of Time Cards to approve.

3 Purchasing and Inventory:

Highlight Purchase Orders to expedite, Unfilled Purchase Orders or Items Below Minimum Stock.

4 Production and Scheduling:

KPIs such as Work Utilization, Late In Process Orders or Released Orders scheduled can be tracked.
