

INDUSTRIOS project
manufacturing is ideally
suited for those operations
that deliver solutions
instead of a discrete
product.

Project Manufacturing establishes a combined Accounting and Management framework for planning, tracking costs and reporting progress. Integration with other INDUSTRIOS modules ensures a single source of the truth with results you can trust.

- Define the project's life cycle from concept to installation using Project Workflow and Statuses
- Establish Statement of Work requirements
- Support alternate payment arrangements using the Invoice Payment Customer
- Clarify the roles and responsibilities of your and your customer's Project team
- Define additional shipping addresses related to the project (e.g. venue, advanced warehouse)
- Track project related dates specific to your operation
- Outline the specific terms applicable to the project

The confidence
the organization
now has in the
data is surprising.

Director of Operations,
Altron Automation

Define Your Projects Your Way

- Determine the appropriate level of tracking required for project lines
- Scale from simple projects to complex using templates.
- Control whether items are billable and shippable
- Match your supply strategy to project lines
- Use Milestones, Phases and Activities to plan and track progress
- Establish internal and external budgets and track at levels that reflect your operation
- Get precise about what you are shipping with the integrated Shipping BOM
- Manage grouping and detail level on invoices with the Invoice Line Group Codes

Leverage Integration to Manufacturing Powerhouse

- Full integration with INDUSTRIOS Shop Floor Tracking, Time Management, Inventory Control, Sales Order Fulfillment and Procurement helps avoid the spreadsheet jungle and ensure a single source of the truth.

Get the Whole Story

- Capture costs beyond traditional manufacturing – marketing, design, prototypes
- Track time in ways that fit employees - shop floor clocking, timesheets or timecards
- Subledger supports revenue recognition – Percent of Completion or Completed Contract

Trust Your Numbers

- View progress, hard and soft costs (commitments), tracked time and invoicing.
- Calculate and post work in progress
- Define and calculate percent of completion

You get it. We get it.

We live, breathe, walk, speak, eat and sleep discrete manufacturing operations.
